Read the passage carefully and answer the following questions.  
(submission-13th August,2024)

### The American Bald Eagle

Have you ever noticed that the **bald** eagle shows up on many coins and flags in the United States? That's because the bald eagle is one of the US national symbols. Why was the bald eagle selected to **represent** the country?

This beautiful bird is found only in North America. A bald eagle soars through the skies like a king. It is strong and it can live up to 50 years. That's quite a long time for a bird.

Though the American Bald Eagle is not bald. It has white feathers on its head. The rest of its feathers are brown.

The food it likes best is salmon (fish). So it lives near streams and rivers. That makes it easy to catch the fish. A male and female will stay together for life. Each year they use the same nest.

Every year they have one or two eggs. Taking care of their hungry babies is a lot of work. Both parents **take turns** finding food. When one goes hunting, the other watches over the nest.

**Glossary** - 1) bald - without hair/feathers

2) represent – to present as

3) take turns - does the work one by one

1. What is the first passage talking about? Tick (✓) the correct answer.

(a) Bald eagle as a bird

☐
